

RECIPE

DIY Dog Friendly Easter Eggs

The content of this article should not replace the advice given to you by your vet. If you are in any doubt, please refer back to your pets veterinary surgeon

You Will Need

- Mini Easter Egg Mould
- 300g of Carob drops
- Pyrex Bowl
- Saucepan (needs to be slightly smaller than the bowl)

Method

1. Place the carob drops into a heatproof bowl.
2. Fill the saucepan about a third full with water and place the bowl on top. Warm the water gradually and stir the carob until it's all melted
3. Spoon the melted carob evenly into each egg mould
4. Place in the fridge until set.
5. Once set - remove from mould.

Now repeat steps 1 - 3 to make the other half of the egg

6. Once you have filled each egg mould for the second time - place a set egg half on top of it.
7. Put in the fridge to set once again - for at least an hour.
8. Take them out of the fridge and remove from their moulds.
9. Wrap the eggs in cellophane or foil - please ensure that you remove before feeding to your dog.
